METALNews

Serving critical manufacturing needs in these unprecedented times.

Light gauge stainless steel, copper and copper alloys for American industry.

During this difficult period for our nation and the world, Heyco Metals continues to provide light gauge metals for use in a wide variety of critical components.

For decades, we've served as a dependable supplier in the production chain for medical devices, automotive and electronic connectors, and more. Now as automakers and other manufacturers adapt to important new roles, we stand ready with the metals they need.

- **Stainless gauges as low as .0015"**
- **Newly expanded upper range of stainless, to .025"**
- **Full range of copper and copper alloys**
- **Custom rolling to your exact specifications**
- **Short lead times**
- **Commitment to quality, including full PPAP compliance**
