

The newsletter of HEYCO Metals

METALNews

Heyco is making headlines worldwide.

Manufacturers and suppliers of critical components throughout North America know about Heyco light-gauge stainless steel for critical applications. Now the rest of the world does, too.

Heyco is featured on the cover of this month's issue of *Stainless Steel World*, a leading international trade publication reaching thousands of users, suppliers and fabricators in the specialty metals industry.

These important decision-makers will learn how Heyco light-gauge stainless steel coil and strip - available in gauges down to .002" - is finding its way into a variety of critical applications, and see how the rigorous Heyco [quality assurance](#) process ensures optimum surface quality with virtually zero defects.

**GAUGES
DOWN TO
.002**

It's no wonder Heyco is catching the attention of the global stainless steel market. Every day, more top suppliers to the automotive, healthcare, electronics, petrochemical and other industries rely on Heyco to help them meet increasing consumer and commercial demand for pristine-quality, light-gauge stainless steel. As technology advances in these and other industries, the need for critical components manufactured from Heyco stainless steel will only increase.

Please take a minute to read the article [here](#). If you would like a print copy of the October issue of *Stainless Steel World* to share with your staff or customers, just call us today at (800) 57-HEYCO.

Whatever your industry, Heyco can deliver light-gauge Stainless Steel to your exact specifications.
